Day 1 : Start of your holiday in Etsaut

Once you have settled into your accommodation you can visit villages of Etsaut or Borce and the Maison du Parc.

- Distance : 4km, duration : around 2h15, altitude gain : +330m, descent : -330m.

Day 2 : From Etsaut to Ayous refuge

Today's walk is challenging with 1700m altitude gain. It offers scenery of an amazing magnitude: the Chemin de la mature, the plateau of Baigt-Sencours, shepherd's cabins and as a highlight, the vision of the Pic du Midi d'Ossau, whose reflection shimmers in the waters of the lake Gentau.

- Distance : 15km, duration : around 6h45, altitude gain : +1700m, descent : -330m.

Day 3 : From Ayous refuge to Gabas

Setting out from the refuge at Ayous, the GR10 drops down to the village of Gabas. Today's walk is shorter and it's a chance to recuperate after yesterday's efforts (or longer variants). The distance from the lake to the village isn't far and will take about 3h00. The village is typically Pyrenean and situated in the famous valley of Ossau, with an emblematic summit, an exceptional flora and fauna, as well as a super cheese ! Possibility of two different longer variants: via Lac Bersau or via the Col de Suzon.

- Distance : 10km, duration : around 3h30, altitude gain : +65m, descent : -990m.
- Distance : 12,5km, duration : around 4h30, altitude gain : +235m, descent : -1155m (Variant Lac Bersau).
- Distance : 20km, duration : around 8h, altitude gain : +930m, descent : -1855m (Variant Col de Suzon).

Day 4 : From Pont du Goua to Gourette

In the morning transfer from Gabas to Pont du Goua or Eaux Bonnes to shorten the hike (optional, contact us). Today's walk is strenuous, the climb up to the Hourquette d'Arre which culminates at 2465m, this is the highest part of the GR10 in the Pyrenees Atlantiques. You descend towards the lake Anglas and continue down to the ski station, Gourette. There is a good chance that you will be able to observe some remarkable fauna such as the majestic rare vautour fauve, vultures, royal eagles, mountain isards and marmots. Late snow covering is regular on this stage : a variant enabling to avoid the high point of Hourquette d'Arre can be organized. Possibility to divide the hike in 2 by adding an extra night, please contact us.

- Distance : 17km, duration : around 7h45, altitude gain : +1550m, descent : -1155m (Pont de Goua transfer).

Day 5 : From Gourette to Arrens Marsous

Today's stage of the GR10 is a transition, the trail crosses the border between the Béarn and Bigorre regions. You will be walking across high summer pastures and past shepherd's cabins to the Col de Tortes at an altitude of 1799m and on to the Col de Saucède at 1525m. You will arrive at the village of Arrens in the Val D'Azun valley, the first market town of the Bigorre region. Then you will reach the village of Estaing via the Bordères pass.

- Distance : 13,5km, duration : around 6h, altitude gain : +900m, descent : -1400m

Day 6 : From Arrens Marsous to Ilheou refuge

From Arrens, you will reach the village of Estaing and its lake, framed by wooded slopes. Then the GR10 joins the high mountain pastures of the Ilhéou pass (2242m), after having passed the Arriousec and Barbat huts. From the pass, the path descends to the Lac d'Ilhéou or Lac Bleu, and its guarded refuge. In case of late snow, a variant is proposed, outside the GR10, by a balcony itinerary, passing above the Lac Noir.

- Distance : 18km, duration : around 7h30, altitude gain : +1650m, descent : -550m

Day 7 : From Ilheou refuge to Caunterets

Just a short walk for the last section of this part of the GR10. To Caunterets, passing by the Escala d'Ilhéou, you will no doubt have the chance to see marmottes and isards. In this high, airy mountain ambiance there are many traces of glacier erosion, lakes and moraines. Possibility of a longer variant via the Haugade Pass and the Marcadau Valley.

- Distance : 8km, duration : around 3h, altitude gain : +75m, descent : -1100m.

•WHAT TO BRING AND PACK

Your main luggage:

For logistical reasons, we ask you not to bring more than one item/person. Its weight should not exceed 12kg - 15kg.

Your day backpack

The size of your bag varies upon the type of activity.

For a walk without portage : 30L minimum

For a walk with partial portage : 50L minimum

For a walk with portage : 60L minimum

Whatever activity you participate in, you should always carry in your rucksack:

- Rainwear, warm clothing, spare T-shirt, sunglasses, sun cream, first aid kit, picnic kit, personal items, etc.)
- Picnic lunch of the day (bring a plastic box)
- Sufficient water (minimum 1.5 litre water bottle)

Walking Boots

The type of boot depends upon the activities you take part in however they are one of your most important items. They should be comfortable, waterproof and breathable. For the best protection we advise ankle boots.

We recommend our young walkers to wear flexible walking boots with a good sole and back.

For mountain walking for more than 4 hours long we recommend a boot with a fairly ridged sole.

If you need to buy a new pair of boots, we advise you wear them in before the start of your holiday. Don't wear boots that are too small because feet have a tendency to swell up. Be careful with your shoes that have been left in the wardrobe for too long. The lifespan of a shoe is 2 to 5 years. After a while the soles will come off and the seams can tear.

Clothes:

- A wind and rainproof jacket
- A thick jumper or a fleece
